Press Release

10.12.2019

The Malta College of Family Doctors (MCFD) seeks to maintain the highest standard of the Specialty of Family Medicine in Malta. By nature of the profession, Family Doctors inherently have a major stake at promoting and fostering the health of the society, to which they provide their services.

MCFD wishes to express its concern about the detrimental bio, psycho, social effects taking place in lieu of recent political developments that have led to a general feeling of insecurity.

The State is responsible for upholding good governance and guaranteeing the stability of its national judiciary and political safeguards. The role of the State also extends into the promotion and protection of the Maltese population's health and social welfare.

The MCFD, thus calls on all responsible state institutions to ensure that the current national crisis is swiftly resolved so as to minimise the social and health repercussions that are currently affecting the general population.
