

Rapid start in HIV: Will this become the 'norm' in clinical practice?

Tuesday 13 September 2022 | 18:00–19:00 CEST

We are pleased to invite you to the next webinar in our Clinical Conversations 2022 series. The objectives of this meeting are to:

- Explore the diverse definitions and guideline recommendations for rapid start in HIV
- Consider the argument for rapid start becoming the 'norm' in clinical practice, including improved linkage to care, and clinical and virologic outcomes
- Consider the argument against rapid start becoming the 'norm' in clinical practice, including logistical constraints, lack of consensus in guidelines and the importance of genotypic resistance testing

Please join us for an interactive and discussion-led webinar

Moderator

Prof. Miguel Gorgolas
Hospital Universitario
Fundación Jiménez Díaz
de Madrid, Spain

Speakers

Prof. Grace McComsey
University Hospital
Health System, Cleveland
Ohio, USA

Dr Guido van den Berk
OLVG Hospital,
Amsterdam, Netherlands
