The 2024 Pneumococcal Vaccine Rollout Registration Software
Integrated with the Influenza & COVID-19 Booster Registration

A Step-by-Step Guide presented by Mr Ronald Barbara
Charge Nurse – SNM Head Office Primary HealthCare (Floriana)

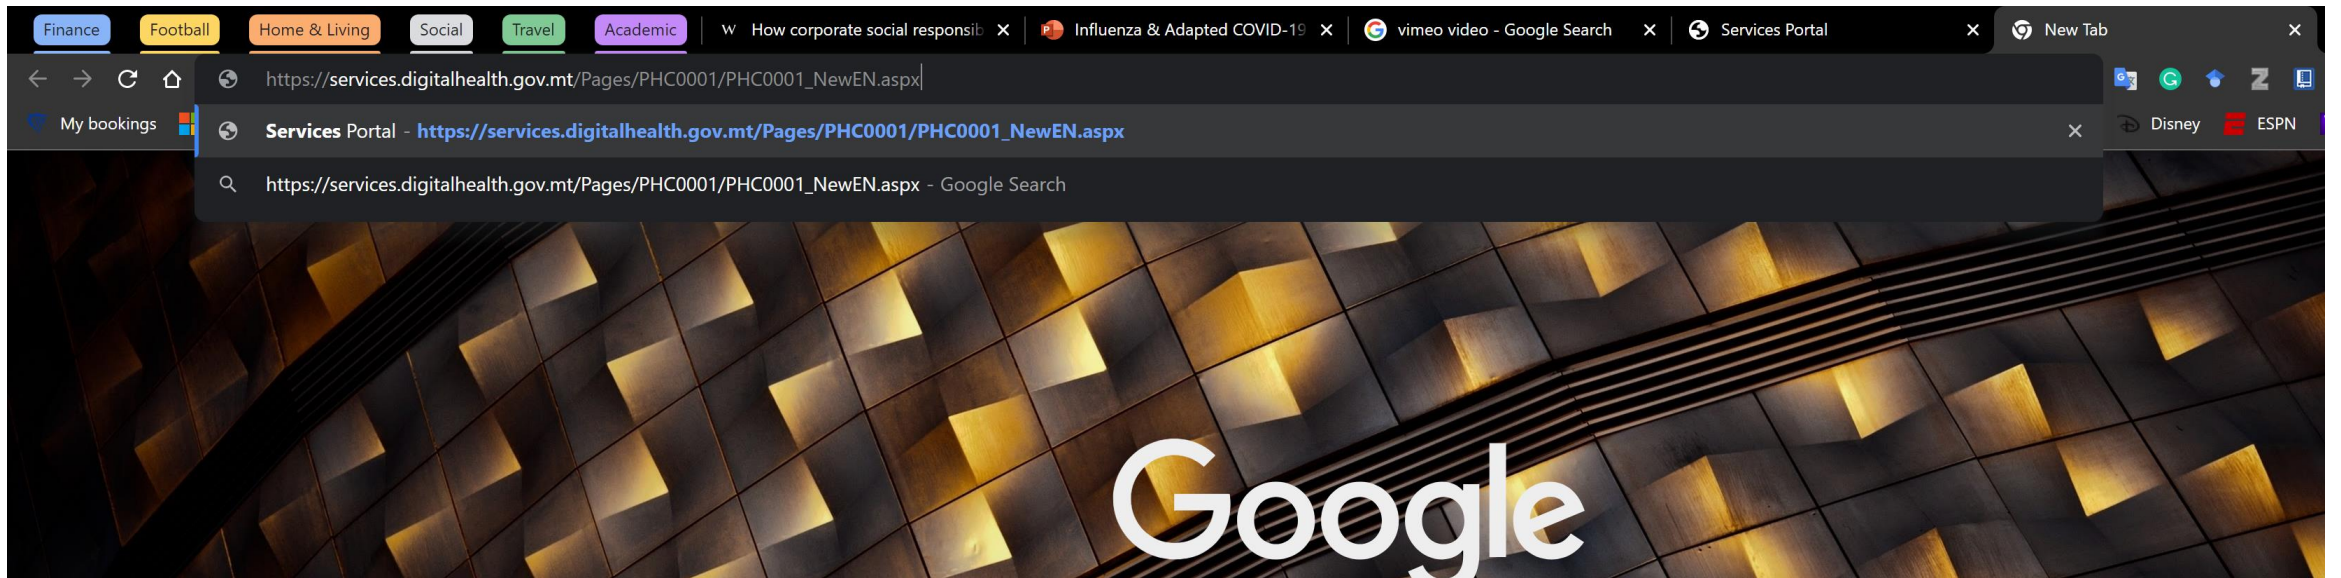

Version.24

1. First, copy below link address (*ctrl+c*)

https://services.digitalhealth.gov.mt/Pages/PHC0001/PHC0001_NewEN.aspx

2. Open Internet browser – e.g. Google

3. Paste the copied above Link address (*ctrl+v*) on the service portal to be browsed and opened.

4. You can also create a desktop shortcut.
Easy ... call IT or Ronald for support how to do it on
any PC desktop.

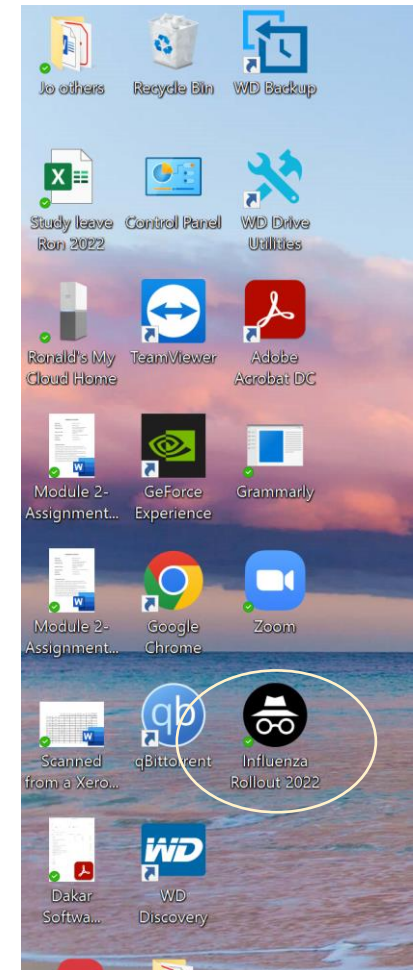

What item would you like to create a shortcut for?

This wizard helps you to create shortcuts to local or network programs, files, folders, computers or Internet addresses.

Type the location of the item:

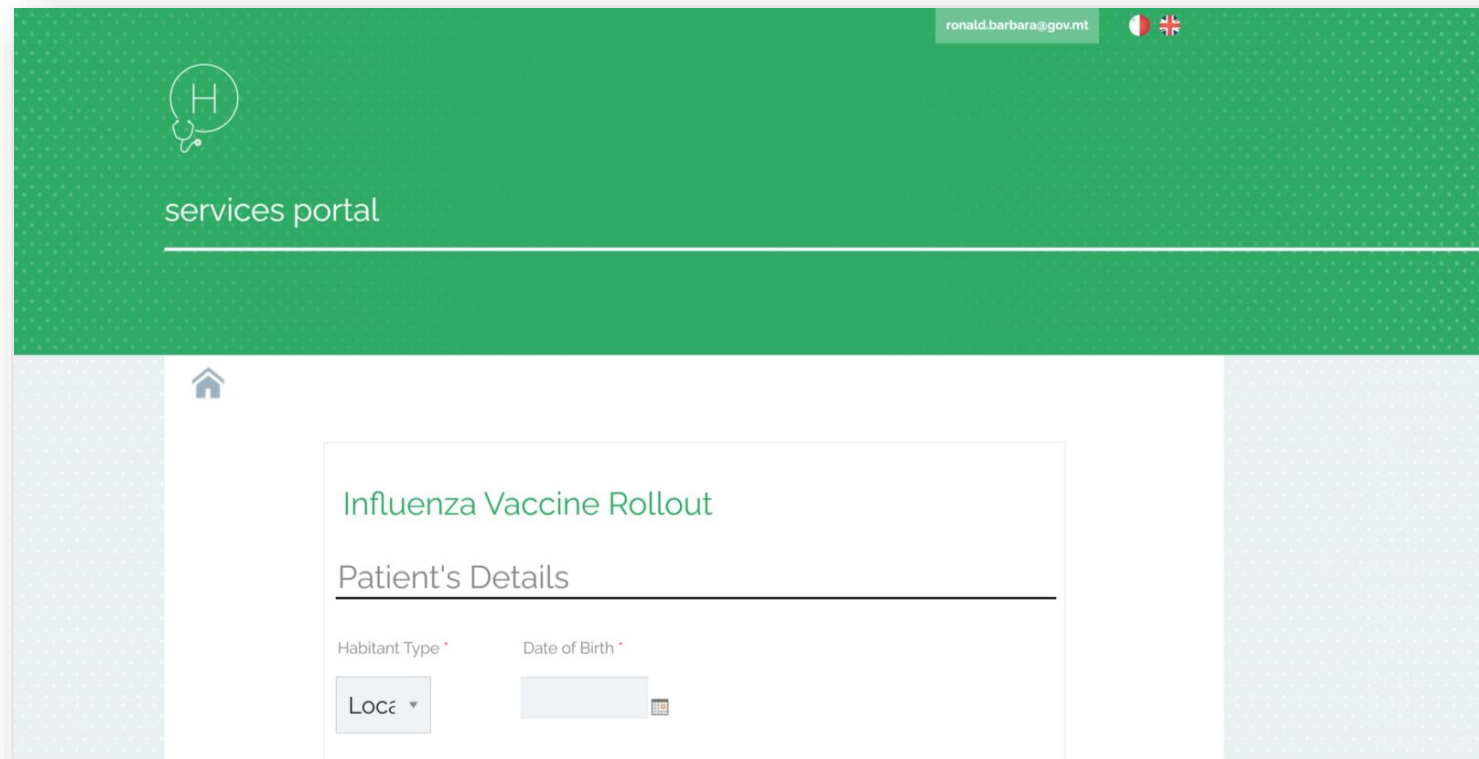

Click Next to continue.

5. Digital health Webpage will open, and prompt you to log in either using the MITA login or E-ID function.

Ideally use the MITA Username (*Corp ID*) followed by your *Corp. Password*.

6. Once, logged on Home page to the Service portal page with your password login (see image below)

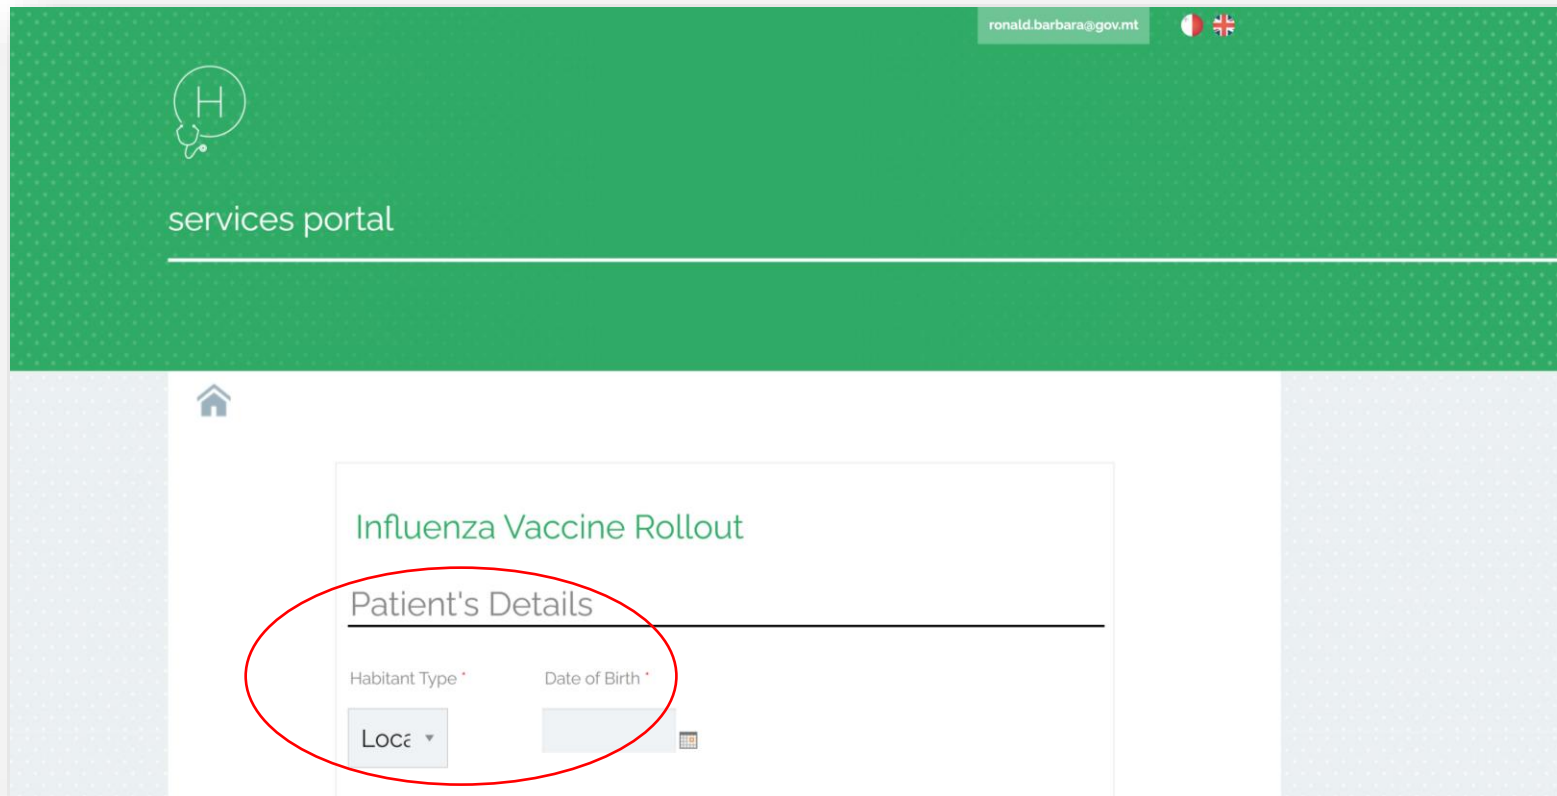

7. Start the Registration of the Vaccination roll-out with **Patient's details**.

8. All * are to be entered, most selections from drop-down menus.

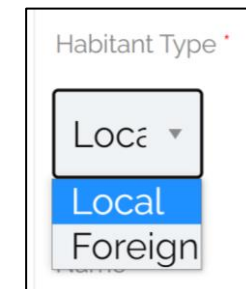

9. First to choose the **Habitant Type**.

9a. Local - all clients with a registered official local ID Card numbers (M/G/A/L/H etc).

9b. Foreign - all visiting & foreign clients who poses no ID card. This function will require manual entry of client's details.

The screenshot shows a web interface for a 'services portal'. At the top, there is a green header with a home icon, a user profile 'ronald.barbara@gov.mt', and a flag icon. Below the header, the text 'services portal' is visible. The main content area features a home icon and a card titled 'Influenza Vaccine Rollout'. Inside this card, the 'Patient's Details' section is highlighted with a red circle. This section contains two fields: 'Habitant Type *' with a dropdown menu showing 'Local' selected, and 'Date of Birth *' with a date picker.

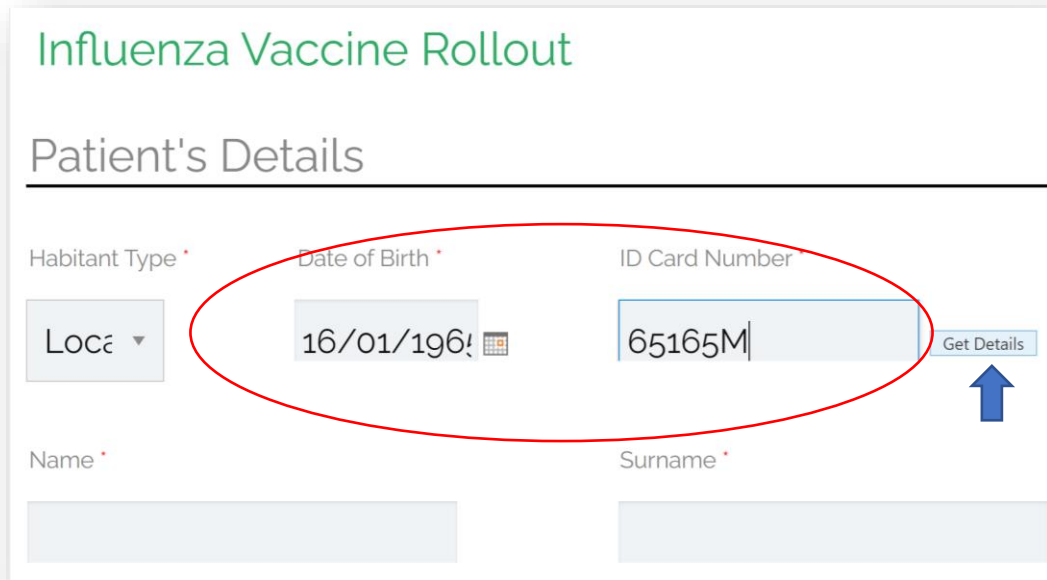

A close-up of the 'Habitant Type *' dropdown menu. The menu is open, showing three options: 'Local' (highlighted in blue), 'Foreign', and an unselected option that appears to be 'Local' with a downward arrow.

10. For the Local Habitant option, the next detail that needs to be entered is the **Date of Birth** and the **ID Card No.** (which are linked together).

These functions are important as the program will link it and generates automatically personal details including Name & Surname of client from  **identità** Malta database system.

11. Hence, enter **Date of Birth**, using the calendar function.

12. Followed by the **ID Card number**. Note: Case-sensitive and extra front “0’s” are not required, refer to image as an example. Then press “*Get Details*” and name, surname and full ID card number will be generated.

Name * Surname *

RONALD BARBARA

13a. Next section is about classification of **age-group** and **vaccination history** checks.

13b. With regards to the age group section, please note that by default, the *17-54 years* age group is shown.

This is therefore a “not automatically calculated field”, thus the correct age group must be selected from the drop-down menu.

13c. If age group is not properly chosen a **red alert note** will be prompted when registration will be saved, stating that *age group does not match date of birth*.

Please address the following:

- Age Group does not match date of birth

Patient's Details

14. The following section is regarding the Clinical Details of the vaccination.

15. Next to choose the right value for the **Institution**, Primary HealthCare is by default.

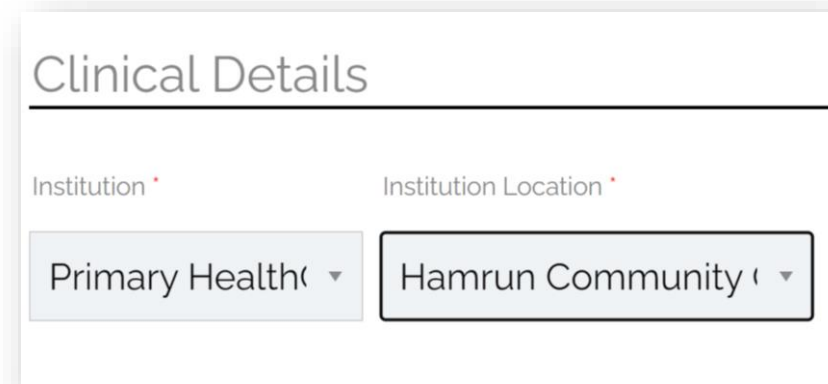

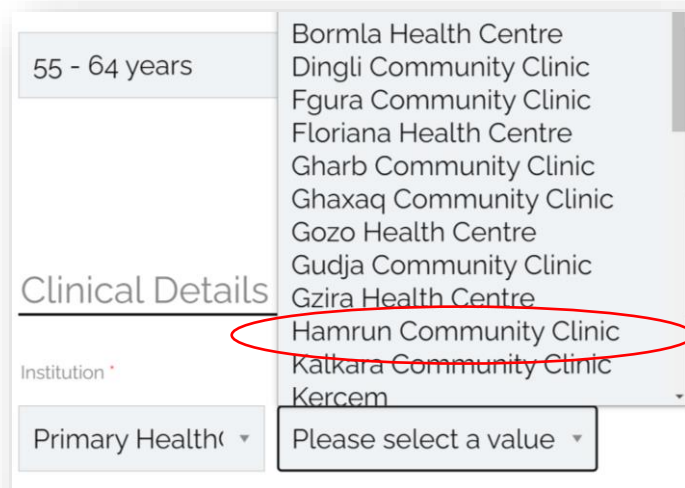

- a. Primary HealthCare will link to a drop-down list of all PHC Health centres, community clinics, NIS and other units. This function is intended for all Primary HealthCare administrators, whilst the
- b. Other institution refers to all other entities that administer the Influenza vaccines such as Private GPs, Pharmacies, Nursing Homes, Residential private settings and Local Council etc.

Lastly, choose the location where vaccination is being administered.

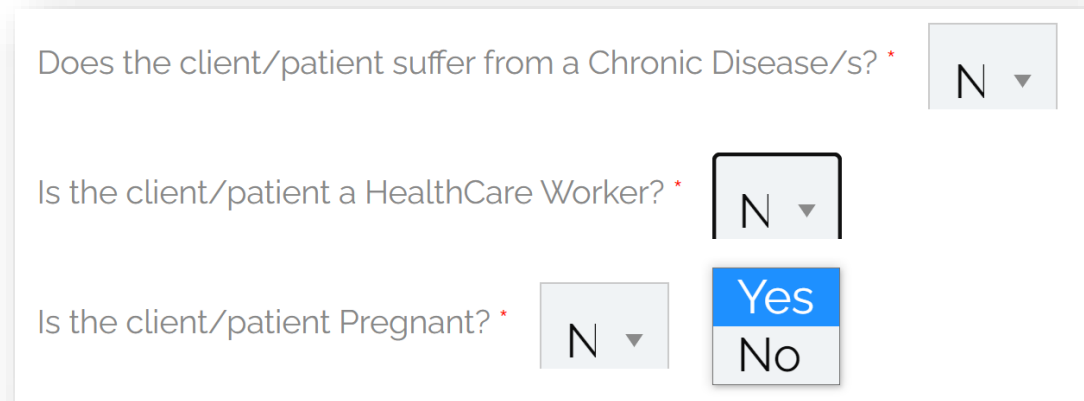

All Institution Locations are listed in alphabetical-order.

Refer to the examples print screen images e.g. used Hamrun Community Clinic.

16. The following part is to choose the information about the client visa-vi his/her eligibility for vaccination.

Choosing the right value (Yes/No/NA) from the next 3 drop-down menus as per print-screen example.

Does the client/patient suffer from a Chronic Disease/s? * N ▾

Is the client/patient a HealthCare Worker? * N ▾

Is the client/patient Pregnant? * N ▾

Yes
No

17. The last part of the registration process is all about the *Vaccination* administration process.

18. First, important to choose (tick) the **Vaccine Administration** command, whether it is Influenza, COVID-19 or Pneumococcal or a combination of all three vaccines, or any two.

19. Automatically, the system will generate a check [Vaccination History](#). A one-liner report of whether any vaccination records are found uncertainty if already received vaccination during this campaign as per archives on the Nintex system.

Vaccine Administration

- COVID
- Influenza
- Pneumococcal

Vaccine Administration

- | | |
|--|--|
| <input checked="" type="checkbox"/> COVID | No vaccination record found for COVID |
| <input checked="" type="checkbox"/> Influenza | No vaccination record found for Influenza |
| <input checked="" type="checkbox"/> Pneumococcal | No vaccination record found for Pneumococcal |

20a. Then follow to the **Influenza** details from 5 drop-down menus:

- Infectious Agent
- Brand name
- Batch Numbers
- Type of Vaccine delivered
- Site of Injection – Left/Right arm

20b. Regarding **COVID Vaccine** details the only detail which will be a bit tricky is the “*Dose Number*”. A number must be entered e.g. 6

Remember that Dose 1 & 2 were the primary doses, then other 3-4 boosters where given (Purple card, Green Card and Yellow Card).

21. Last important information is **Date of Administration** by using the calendar function.

Influenza Vaccine Details

Infectious Agent	Brand Name	Batch Number
Influenza	Influvac Tetra	G36
Type of Vaccine Delivered	Date of Administration	
Intramuscular Vaccine	22/10/2024	
Site of Injection		
Left Arm		

COVID Vaccine Details

Infectious Agent	Brand Name	Batch Number
COVID	Pfizer Biontech XBB1.5	HH0832
Type of Vaccine Delivered	Dose Number	Date of Administration
Intramuscular Vaccine	6	22/10/2024
Site of Injection		
Right Arm		

22. This year we introduced the 3rd. Vaccine

The **Pneumococcal Vaccine** details will need to be inputted from 8 different drop-down menus:

- Infectious Agent
 - Brand name
 - Batch Numbers
- Type of Vaccine delivered
 - Dose Number = 1
 - Date of Administration
- Site of Injection – Arm or Thigh
- Whether immuno-compromised Adult or vulnerable child option.

Pneumococcal Vaccine Details

Infectious Agent	Brand Name	Batch Number
Pneumococcal	Prevenar 20	LK4704
Type of Vaccine Delivered	Dose Number	Date of Administration
Intramuscular Vaccine	1	22/10/2024
Site of Injection	<input type="checkbox"/> Immunocompromised Adult	<input type="checkbox"/> Vulnerable Child
Right Arm		

Save **Cancel**

23. Finally, important to press **SAVE**.

If any parameter is missing, system might fail to save, and a **RED Alert notification** will be prompted.

Please address the following:

- Age Group does not match date of birth
